

# SUSTAINOPP

## Revolutionising Sustainability Reporting with AI-Powered Benchmarking and Diagnostics

SustainOpp's **AI-powered solution** evaluates your sustainability reporting, extracting actionable insights from your corporate disclosures. Using a **robust database of comparable businesses** across similar regions, industries, and markets, we uncover insights and opportunities **you can't afford to miss**, delivering **tailored benchmarking** and **precise gap analysis** to enhance your disclosure quality.

## What We Deliver

### Comprehensive Gap Analysis

Using our AI-powered diagnostics, we identify gaps and shortfalls in your ESG disclosures compared to industry best practices and global standards like ISSB, TCFD, CSRD and others.

### Benchmarking Excellence

Compare your performance against peers to uncover areas for improvement and gain a competitive edge.

### Management Report

A detailed, decision-useful document highlighting actionable recommendations to enhance the rigour and robustness of your sustainability reporting relative to peers.

## Key Benefits for your Organisation

### Swift Turnaround, Big 4 Expertise

Get top-tier insights from strategy consultants and industry specialists - **without the excessive costs** of large consultancies.

### Cost-Effective Compliance

Stay ahead of regulatory requirements as mandatory reporting **expands globally** to capture most businesses. **Act now to avoid falling behind.**

### Investor Confidence

**Meet investor expectations** with transparent, audit-ready reporting and showcase your **sustainability strengths.**

### Reducing Cost of Capital

Strong sustainability reporting appeals to lenders and banks, improving credit risk assessments and **lowering financing costs.** Don't let **weaker disclosures cost you more.**

### Stakeholder Value

Sustainability reporting extends beyond financial stakeholders. **Falling short risks weakening these critical relationships.**

## What Sets Us Apart

### AI-Driven Precision:

Our advanced tool benchmarks your disclosures against the most relevant competitors, ensuring precise and meaningful insights.

### Deep Industry Expertise:

With backgrounds at leading consultancies and leading global firms, our team combines decades of practical experience with technical expertise.

### Tailored to your Industry:

Our solution is designed specifically for your sector, combining **best-in-class data and expertise** for strategic decision-making.

## Rising Expectations - Sustainability in Corporate Reporting is now Critical

Large-cap, major companies are increasingly requiring sustainability information from their business relationships to meet their own regulatory and stakeholder demands. Businesses that fail to provide credible ESG data **risk being overlooked, losing valuable relationships, and falling behind** as the market evolves.

At the same time, **sustainability regulations are set to expand globally, capturing mid-market companies and SMEs in the near future.** Acting now ensures you stay ahead of these changes, strengthen key relationships, and future-proof your business.

**Don't wait — Close the gaps in your Sustainability Reporting to meet Stakeholder Expectations now.**
